## INSTRUCTIONS TO PREPARE THE REPLACEMENT BACKGROUND ON SIOL.NET

The new background replaces the traditional website background and is visible on the left and right sides of the screen next to the website content. It is only displayed on the screen with a resolution of $\mathbf{1 6 0 0} \mathbf{~ p x}$ or more.

## Basic instructions

. The ad should be an image in .jpg or .png format.

- The image should be $\mathbf{1 9 2 0} \mathbf{~ p x}$ wide, whereas the height of the image is not clearly defined and is subject to the design. We recommend up to $\mathbf{1 0 0 0} \mathbf{~ p x}$.
- The ad should not exceed $\mathbf{2 0 0} \mathbf{~ k B}$.

## The visibility of the ad

The visibility of the ad depends on the screen size [resolution] of the visitor. Hence it is important that the design is prepared in such a way that the main message of the advertising campaign is visible to the visitors with lower screen resolutions as well.
This means the majority of the message needs to be in the upper half of the screen next to the central section. Typical screen widths of the visitors that will see the backgrounds are 1600,1680 and 1920 px .

## Visibility examples on different screens:

An example of ad visibility to visitors with the 1920 px screen width:

[^0]
## Preparing the ad

- Prepare the $1920 \times 1000 \mathrm{px}$ ad.
- The central part of the ad is 1250 px wide. The part on the top with the design is 290 px high. The remaining space is white [\#FFFFFF].
- Due to different screen dimensions [see above], we recommend that the main message of the ad is in the upper section and about $\mathbf{1 7 5} \mathbf{~ p x}$ wide.
- Reason: the entire main message is visible on all typical screen sizes [1600, 1680 and 1920 px ].
- On the left, the design is $\mathbf{3 3 5} \mathbf{~ p x}$ wide.
- On the right, the design is $\mathbf{3 3 5} \mathbf{~ p x}$ wide.
- On the top, the design is $\mathbf{2 9 0} \mathbf{~ p x}$ high.
- We recommend that that the bottom left and right sides of the ad fade into white [\#FFFFFF]. By doing this, the ad »integrates<< with the website as the visitor scrolls down.
