INSTRUCTIONS FOR CREATING TELOP AND VIDEO

Telop

To create a telop, we need **open files** of images or photos (vector images if possible), highest resolution files available, Adobe file formats or similar. Customer should provide as much information as possible: which elements should be placed in telop, the position of elements, time in sequence etc.

Video

From already recorded materials:

The customer should provide:
· open files, which we include in video,
· short editing script.

The materials are recorded and edited by us:

The customer should provide:
· graphic elements, which are included in video content and text,
· short script.

Showcases are available here.
